Computer Aided Design

Index to Volume 5 Numbers 1–4 pages 1–270
ISSN 0010-4485

Advisory Editorial Board

Professor F. E. BEZIER,
Regie Nationale des Usines Renault, Paris, France.

D. G. ELMS,
Department of Civil Engineering, University of Canterbury, New Zealand

B. GOTT,
Chief Consultant, Computer Aided Design Centre, Cambridge, England

T. W. MAVER,
Department of Architecture and Building Science, University of Strathclyde, Glasgow, UK

Professor P. J. GRANT,
Professor of Nuclear Engineering, Imperial College, London, England

Professor F. G. HEATH,
Professor of Computer Engineering, Heriot-Watt University, Edinburgh

Professor J. VILLADSEN,
Instituttet for Kemiteknik, Danmarks Tekniske Højskole, 2800 Lyngby, Denmark

A

ABACUS, grants for 47
ACSIM – An accelerated constrained simplex technique 22
Alignment-sensitive probe for an image projector 77
An efficient method for the computation of second order network sensitivity functions: A comment 105
Application of interactive graphics to computer-aided circuit design 136
Appointment, board 184
Approximate linear algebraic equations 129
Architect and the computer 191
Architects, help for 120
Architecture: International Conference and Exhibition, 53
Architecture, seminar on: computers in the public sector 113

Metrication 119
Micro-electronics design, graphics aid 183
Minicomputers in data processing and simulation 193
Minicomputer market 48
Mini-memory 189
Module placement and wire routeing according to a structured biplanar scheme in printed boards, automated 152
Mullard TAA263 and Plessey SL611C integrated circuit models 90

N

NATO Advanced Study Institute on network and signal theory 111
Networks, computer 193
Networks, electricity distribution 253
Networks, optimal design of pulse-forming 2
Nodal triangulation for finite elements, automatic 33
Nuclear plant design, computer aids for 215
Numerical control, faster 125
Numerical controlled machine tools, PROLAMAT '73: Programming languages for 258
N.c. part programming using cheap graphics, CAD Centre scene 268

O

Offline plotting/digitizing 188
Optical system design 46
Optical systems, computer-aided design of 52
Optimal design of pulse-forming networks 2

P

Packaged c.a.d. 119
Package for whole hospital design, PHASE: An appraisal 81
Participation in housing design, computer aids for 166
Part programming using cheap graphics, CAD Centre scene 268
Part 2 – The mathematics, cubic spline package 7
P.c.b. package, Solatron install Redac 46
P.c.b. software sale 184
Pen recorder 125
PHASE: An interactive appraisal package for whole hospital design 81
Photochromic image display driven by computer 188
Photomontage system for site planning 103
Pictures of solid objects 14
Planning tools for ocean transportation 129
Plotters 50, 51
Plotter sales 119
Plotting/digitizing, offline 188

Pressure vessel design, computerized 253
Principles of computer-aided design 55
Printed boards, automated module placement and wire routeing 152
Printed circuit layouts, the use of computer aided design techniques in 147, 254
Printer, high volume 124
Probe for an image projector, alignment-sensitive 77
Problems of communication, Light Pen (inside back cover April issue)
Problem solving, man/computer 191
Proceedings of the symposium on computers and automata 127
Process design for chemical engineers 64, 228
Programmable calculator additions 49
Program, slope stability 186
Psychology of computer programming 192
Public sector architecture, Computers in 113
Pulse-forming networks, optimal design of 2
Pump design, drawings generated algorithmically 197

R

Rack and pinion unit 189
Recorders, strip chart 189
Research in progress:
Department of Architecture and Building Science, Strathclyde, UK 109
Department of Civil Engineering, Canterbury, New Zealand 242
Department of Computing and Control, Imperial College, London, UK 39
Department of Electrical Engineering, Heriot-Watt University, UK 171
Department of Mechanical Engineering, University of Birmingham, UK 174
Department of Mechanical Engineering and Electrical Engineering, Imperial College, UK 36
School of Electronic and Electrical Engineering, Kingston Polytechnic, UK 245
Research support for computer-aided design 183
Rover engineering research, vehicle systems 252

S

Sales, digitizer 124
Sales, plotter 119
Sculptured products, general design and production system 68
Second order network sensitivity functions: A comment, an efficient method for the computation of 105
Seminar on: Computers in public sector architecture 113
Ship design 123
Shoe manufacturing 120
Simplex technique, ACSIM 22
Site planning, photomontage system for 103
Slope stability program 186
Software agreement 119
Solatron install Redac p.c.b. package 46
Solid objects using a graph plotter, drawing pictures of 14
Solving, man/computer problem 191
Sparse matrices 128
Strip chart recorders 189
Surface definition, an analogue approach 234
Symposium on computers and automata, proceedings of 127
Systems and technology, computers 114

T

Technical computing in construction 185
Textile design, weft-knitted 252
The common ground, computer-aided design 106
The computer speaks 184
The psychology of computer programming 192
Three-dimensional surfaces in c.a.d. Film produced by the Computer Aided Design Centre 128

Titles

ACSIM – An accelerated constrained simplex technique, Dixon, L. C. W. 22
Alignment sensitivie probe for an image projector, Frush, D. I. 77
Analogue approach to surface definition, Bloomer, J. P., Sadeghi, M. M. and Tidbury, G. H. 234
Application of a computer to hopper design, Bundalli, N. 224
Application of interactive graphics to computer-aided circuit design, Drew, A. J. 136
Automated module placement and wire routeing according to a structured bi-planar scheme, Alia, G., Frosini, G. and Maestrini, P. 152
Automatic nodal triangulation for finite elements, Saw, C. B. and Smith, R. G. 33
Balance approach to process design by computer, Hutchinson, H. P. and Leesley, M. E. 228
Computer-aided design in electron optics, Hawkes, P. W. 200
Computer-aided design – the common ground, Coales, J. F. 106
Computer aids in experimental nuclear plant design, Hilton, R. K. 215
Computer aids for participation in housing design, Coleman, J. R. 166
Cubic spline package. Part 2 – The mathematics, Nutbourne, A. W. 7
Design, development, documentation and support of a major finite element system, Henrywood, R. K. 160
Drawing pictures of solid objects using a graph plotter, Griffiths, J. G. 14
Efficient method for the computation of second order network sensitivity functions: A comment, Seth, A. K. and Roe, P. H. 105
FORMELA: A general design and production system for sculptured products, Skappel, H. E. 68
From words to wires by computer-aided design, Evans, A. H. and Edmonds, P. 237
Mullard TAA263 and Plessey SL611C integrated circuit models for use in linear computer-aided circuit design programs, Kay, J. 90
Optimal design of pulse-forming networks, Stehle, W. 2
PHASE: An interactive appraisal package for whole hospital design, Kernohan, D., Rankin, G. D., Wallace, G. D. and Walters, R. J. 81
Photomontage system for site planning, Lever, P. D. 103
Research in progress:
ABACUS Services, University of Strathclyde, UK, Maver, T. W. 109
Imperial College, London University, Grant, P. J., Elliot, W. S. and Spence, R. 36
Department of Civil Engineering, The University of Canterbury, New Zealand, Elms, D. G. 242
Department of Electrical Engineering, Heriot-Watt University, Edinburgh, UK. Heath. F. G. 171
Department of Mechanical Engineering, University of Birmingham, UK, Taylor, S. 174
School of Electrical and Electronic Engineering, Kingston Polytechnic, Surrey, UK, Kaposi, A.A. and Rzevski, D. 245
TORVAP-A: A computer program for the torsional vibration analysis of multi-junction multi-branch systems, Edwards, A. J. 139
Use of c.a.d. techniques in printed circuit layout, Besant, C. B., Hamlyn, A. and McLintock, P. M. 147
Two pen recorder 125

U

Use of computer aided design techniques in printed circuit layouts 147, 254
Use of electronic computers in chemical engineering 257

V

Vehicle performance improvement 252
Vibration analysis, TORVAP-A computer program 139

W

Weft-knitted textile design 252
Wire routeing and layout 147, 152, 254

X

XY recorder 49, 125
